

KEY - Tree Removal Analysis

Trees of poor condition rating

- ✗ Category 0 - Trees that are dead or near dead (0)
- Category 1 - Trees that are declining, or obviously hazardous (6)
- Category 2 - Trees that are stressed or damaged, or have poor form or structure (15)

Trees of good condition

- Category 3 - Trees that would benefit from Crown Maintenance pruning (23)
- Category 4 - Trees that require little or no maintenance at time of inspection (7)
- Category 5 - Trees of good form, structure and condition (0)

Trees or tree groups identified as significant

⊗ These trees may have a low condition rating due to identifiable defects or other problems. However, due to their visual amenity and contribution to the landscape character of the site, these trees may warrant design changes to ensure their retention.

Categorisation based on Arboricultural Assessment prepared by Urban Forestry Australia February 2008
